

Crushed #3A Gravel

- * Clean, washed, non-packing
- * NYSDOT 703-2, size 3A
- * This material is suitable for building a farm or logging road
- * We produce this product at: Collins, Freedom, Hanover

Item Description

This clean, crushed, washed gravel is primarily 1-1/2" with a top size of 2" and is commonly used as an ingredient in asphalt base courses. This coarse stone works well for constructing a farm or logging road over reasonably stable soils. It is very difficult to shovel this coarse product by hand.
