- \* Compactable road and building pad material
- \* Excellent backfill material
- \* NYSDOT 304 Type 4 Subbase
- \* We produce this product at: Collins, Freedom, Great Valley, South Dayton, Springville

### Item Description

Minus 2" Screened Gravel is produced by processing Bank Run Gravel through a 2" screen. The resulting material is a 2" and minus compactable subbase. This product varies in consistency depending upon the source. The 2" Screened Gravels we produce at all of our various sources meet NYSDOT 304 Type 4 requirements for soundness and particle size.
