

-1" Crusher Run Limestone

- * Compactable; contains crushing fines
- * Premium Driveway Topping Material
- * We stock this product at: Chaffee, Collins, Hanover, South Dayton, Springville

Item Description

Minus 1" Crusher Run Limestone is produced by crushing blasted Limestone and reducing everything to 1 inch and smaller. The result is a highly compactable subbase that is ideal for building and resurfacing driveways and parking lots. Its gray color is visually distinct. Crusher Run Limestone is not locally produced, so the cost of importing it to our yards makes it a little more costly than gravel products.
