

Crushed #3 & #4 Gravel, ASSHTO #1

- * Not washed
- * Good foundation material for building a road or driveway over unstable soil
- * Excellent truck and logging road material
- * We produce this product at: Great Valley, Springville

Item Description

This extremely coarse, crushed, gravel with a top size of 4" is good for building truck roads over poor or muddy soil conditions. Although the sample pictured is washed, this is not a washed product; it is produced by dry screening, which allows for considerable dirt and fines to cling to the finished product.
